

NEW ITEMS JUNE 2014 THE WIKING CITY LIVES

1110 01 WIKING building cut-out sheet (grooved and punched)

0682 02 Cement mixer (Magirus Saturn)

0800 10 Taxi - Audi 80

0293 03 Community services - VW T3 crew cab

0601 26 Fire service - MB Sprinter Bus

0695 05 Army - Unimog U 1300 L

0781 01 Tanker (Henschel HS 100)

0514 02 Flatbed truck (MAN "Pausbacke")

0580 49 Car transporter (MB Pullman)

The historical WIKING world comes to life – the building cut-out sheet of the 1950s matching the street map reprint does the trick! In only a very short construction time, a stylized WIKING city of those years comes into being, making an ideal backdrop for the historical models. And more new classic products as well as an exclusive range of accessories help you to design the street scenery just like it

was back then. Included in this are the Mercedes-Benz Pullman car transporter with ramp as well as the Henschel HS 100 tanker of the "Gasolin" brand legend. But also harmonically joining the group are the Magirus Saturn cement mixer in authentic two-tone drum version and the flatbed truck with MAN "Pausbacke" tractor. In addition, two young-timer innovations make their debut in the range with the

Audi 80 taxi and the VW T3 crew cab transporting a wheelbarrow in the back. The same goes for the Mercedes-Benz Sprinter, which celebrates its premiere as a van for the fire service crew.

MODEL UPGRADES JUNE 2014 OPERATION BY FIRE SERVICE

0628 47 Fire service - Metz B32 heavy-duty rescue platform (MB Eonic)

0626 05 Fire service - Rosenbauer FLF Panther 6x6

0864 33 Gendarmerie - Citroën ID 19

0030 02 VW Beetle 1200

0140 01 MB 220

0384 03 Claas Rollant 350 RC round baler

0899 04 Fendt Farmer 2

0378 02 Lemken EurOpal7 plow

0388 13 Joskin feed transporter

0480 03 Flatbed truck (Krupp Titan)

The focus of the WIKING model upgrading is on two absolutely up-to-date 1:87 large fire trucks. The first in the range is the Metz B32 heavy-duty rescue platform on the chassis of the Mercedes-Benz Eonic in the design of the „Straelen“ fire service and the Rosenbauer Panther 6x6, whose model is the fire truck deployed at the Braunschweig-Wolfsburg Airport. For N-gauge model train fans, the Rosenbauer RLFA 2000 AT is making its appearance in the model range. The

0963 03 Fire service - Rosenbauer RLFA 2000 AT
N-gauge 1:160

Claas Rollant round baler, the Lemken EurOpal7 plow as well as the Joskin feed transporter return as upgraded models and augment the tractor range. The most popular WIKING classics make a return: The Krupp Titan flatbed truck stands at the top of the list, in the

colors of the „Rheinisch-Westfälischer Frachten-Kontor“; the Mercedes-Benz 220 pontoon and the VW Beetle 1200 in typical Lufthansa colors return to the model range as well. The Citroën ID 19 is reminiscent of the „Gendarmerie Nationale“, while the Fendt Farmer 2 stands for an agricultural era of long ago.

0773 43 Fendt 939 Vario (2014)

The Fendt 939 Vario represents design, aesthetics and model-building pleasure in details – WIKING gets to the heart of it with this 1:32 model! The traditional model makers miniaturize the top-of-the-range tractor, whose prototype will find its way into many big business farmyards. The Fendt 939 Vario is the flagship from Marktobendorf; with its extremely powerful performance, it is exceedingly well-suited to the very heavy-duty tasks out on the field. WIKING places great emphasis on the finely detailed design of the cab and the interior. The same applies to the design of the engine and hood.

0773 22 Fliegl ASW 391 with spreader mechanism

The fully functional Fliegl Gigant ASW 391 push-off trailer is getting an additional function! Large-scale agriculture is really where the rear spreading device for the load has gained substantially in importance. WIKING has miniaturized the spreading device, and equally the complete model, with a high degree of functionality and mobility. The model combines and optimizes the benefits of all well-known transport systems.

NEW ITEMS JUNE 2014 FRONT LOADER ADDITIONS

0773 85 Front loader tools - Set A

This way, the WIKING tractors bring more scale model pleasure: The Set A with front loader additions modeled after the Bressel & Lade make includes high dump bucket, round and rectangle bale tongs as well as logging grabber. The high dump bucket enables the enhancement of the dump height and tipping angle, which is useful for everyday use. Thanks to the round and rectangle bale tongs, the safe and undamaged transport of straw bales and wrapped bales as round and square bales is guaranteed. The “sickle shaped” logging grab is designed for loading wooden trunks and small wood.

0773 86 Front loader tools - Set B

For front loader equipment, the Set B contains silage cutter, big bag carrier with big bag and brush pile grab. The silage cutter is a reliable additional device suitable for the clean removal of silage of any kind in agriculture. The special big bag carrier guarantees the safe transport of big bags. Owing to the raised hydraulic front loader, the big bags can be used for the easy filling up of seed drills, for instance, or the loading of trailers. The brush pile grab has a fully mobile mechanism, which makes the grapple and the four tines spread apart.
